- 5.0 Gal / 52.5 lbs (23.82 kg)

RES PLUS is specifically formulated to speed up the rate of crop residue decomposition. RES PLUS is compatible with soil conditioners and surfactants. If exogenous bacteria are to be added, they should be added at the same time.

DIRECTIONS FOR USE: Shake well before diluting with water. Dilute at least 50 parts water to 1 part contents. Product can be applied by ground rig, back pack sprayer or through irrigation water. For best results RES PLUS should be applied to crop field residues just prior to plowing or discing the stubble, straw or stalks.

SMALL GRAINS: Multiply the yield in bu/acre by 0.35 to get the application rate in oz/acre for RES PLUS. For kg/ha multiply by 0.45 to get the application rate in ml/ha RES PLUS. Example: with seasonal yield of 100 bu/acre x 0.35= 35 oz/acre application rate.

LARGE GRAINS: Multiply the yield in bu/acre by 0.28 to get the application rate in oz/acre for RES PLUS. For kg/ha multiply by 0.36 to get the application rate in ml/ha RES PLUS. In high organic soil application rate may be reduced to 8-14 oz/acre (600-1050ml/ha).

AERIAL APPLICATIONS: Uniformly apply 1.2 lbs/acre (16 oz/acre) with accurately calibrated aerial equipment in 5 or more gallons of water/acre.

COMPATIBILITY: RES PLUS is non-phytotoxic when used as directed and compatible with most commonly used fertilizers and pesticides. Pilot test compatibility of all chemical mixes.

STORAGE: Store optimally at temperatures between 33°F and 100°F. Under these conditions RES PLUS will remain viable for 24 months. RES PLUS stored for prolonged periods above 100°F will slowly lose its efficacy and will be viable for less than 24 months.

LIMIT OF WARRANTY AND LIABILITY: ELEMENTAL ENZYMES AG & TURF, LLC WARRANTS THAT THE PRODUCT CONFORMS TO THE CHEMICAL DESCRIPTION ON THE LABEL AND IS REASONABLY FIT FOR THE PURPOSES STATED ON THE LABEL WHEN USED IN ACCORDANCE WITH THE DIRECTIONS UNDER NORMAL CONDITIONS OF USE.
